

Pfizer Oncology to Showcase New Data from Innovative Science That Address Patient Needs at ASCO 2019 Annual Meeting

Wednesday, May 15, 2019 - 01:01pm

Data spans 10 therapies across 10 types of cancer

Pfizer Inc. (NYSE:PFE) will present data across its industry-leading oncology portfolio, covering multiple tumor types and mechanisms of action at the 55th Annual Meeting of the American Society of Clinical Oncology (ASCO) in Chicago from May 31-June 4, 2019. Data will highlight Pfizer's cutting-edge approach, expertise in precision medicine and work in immunotherapy combinations, including company-sponsored and collaborative research studies.

"The data presented at this year's ASCO showcase our continued commitment to follow the science, whether it's expanding our approved medicines for breast and prostate cancers into new populations and lines of therapy, or exploring the important role of biomarkers and immunotherapy combinations," said Dany Habr, M.D., Chief Medical Officer, Pfizer Oncology. "We look forward to both sharing our exciting data in these and other tumor types, as well as connecting with our research partners to determine how we can continue to work collaboratively to bring transformative therapies to our cancer patients."

The research to be presented includes new insights on Pfizer's marketed therapies, including IBRANCE® (palbociclib), XTANDI® (enzalutamide), TALZENNA® (talazoparib), BOSULIF® (bosutinib), INLYTA® (axitinib) and BAVENCIO® (avelumab), which represent Pfizer Oncology's long-standing legacy of developing innovative therapies for patients in need, as well as its ongoing commitment to addressing the needs of cancer patients

across gender, ethnicity and tumor type. For example, Pfizer will present real-world data on the use of IBRANCE for the treatment of men with metastatic breast cancer (MBC).

“At this year’s ASCO, I am particularly excited that we’ll share data from new initiatives such as the oral presentation of talazoparib in breast cancer or other solid tumors. This builds on a productive year with the approval of four new oncology treatments, three biosimilars and three new indications, including one based on real-world evidence,” said Chris Boshoff, M.D., Ph.D., Chief Development Officer, Oncology, Pfizer Global Product Development. “We are proud to have one of the broadest oncology portfolios in the industry, and a research philosophy that puts patients first, embraces new approaches and showcases innovative thinking.”

Key Pfizer-sponsored, investigator-sponsored and collaborative research abstracts leveraging the depth of Pfizer’s scientific advances include:

A poster presentation on real-world evidence of male breast cancer patients treated with IBRANCE in combination with endocrine therapy (Abstract 1055). An external investigator-sponsored oral presentation on a Phase 2 trial examining TALZENNA beyond BRCA, specifically as monotherapy in BRCA1 and BRCA2 wild-type patients with advanced HER2-negative breast cancer or other solid tumors with a mutation in homologous recombination (HR) pathway genes (Investigator-sponsored abstract 3006). Biomarker analyses from JAVELIN Renal 101 that studied BAVENCIO plus INLYTA vs. sunitinib in advanced renal cell carcinoma (aRCC) (Abstract 101). An external collaborative research presentation on genomic markers of early progression on fulvestrant with or without IBRANCE for ER+ advanced breast cancer in the PALOMA-3 trial (Collaborative research abstract 1010).

Details for the Pfizer-sponsored, investigator-sponsored and collaborative research oral presentations are below:

Title/Abstract Number	Date/Time (CDT)	Location (Abstract 101)
Biomarker Analyses from JAVELIN Renal 101: Avelumab + Axitinib (A + Ax) vs Sunitinib (S) in Advanced Renal Cell Carcinoma (aRCC)

About Pfizer Oncology At Pfizer Oncology, we are committed to advancing medicines wherever we believe we can make a meaningful difference in the lives of patients. Today, Pfizer Oncology has an industry-leading portfolio of 18 approved innovative cancer medicines and biosimilars across more than 20 indications, including breast, prostate, kidney, lung and hematology. Pfizer Oncology is striving to change the trajectory of cancer.

Pfizer Inc: Working together for a healthier world® At Pfizer, we apply science and our global resources to bring therapies to people that extend and significantly improve their lives. We strive to set the standard for quality, safety and value in the discovery, development and manufacture of health care products. Our global portfolio includes medicines and vaccines as well as many of the world's best-known consumer health care products. Every day, Pfizer colleagues work across developed and emerging markets to advance wellness, prevention, treatments and cures that challenge the most feared diseases of our time. Consistent with our responsibility as one of the world's premier

innovative biopharmaceutical companies, we collaborate with health care providers, governments and local communities to support and expand access to reliable, affordable health care around the world. For more than 150 years, we have worked to make a difference for all who rely on us. We routinely post information that may be important to investors on our website at www.pfizer.com. In addition, to learn more, please visit us on www.pfizer.com and follow us on Twitter at @Pfizer and @Pfizer_News, LinkedIn, YouTube, and like us on Facebook at [Facebook.com/Pfizer](https://www.facebook.com/Pfizer).

DISCLOSURE NOTICE: The information contained in this release is as of May 15, 2019. Pfizer assumes no obligation to update forward-looking statements contained in this release as the result of new information or future events or developments.

This release contains forward-looking information about Pfizer Oncology's marketed oncology portfolio, including, among others, BAVENCIO (avelumab), INLYTA (axitinib), IBRANCE (palbociclib), TALZENNA (talazoparib) and XTANDI (enzalutamide), including their potential benefits, that involves substantial risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. Risks and uncertainties include, among other things, uncertainties regarding the commercial success of Pfizer's oncology portfolio; the uncertainties inherent in research and development, including, without limitation, the ability to meet anticipated clinical trial commencement and completion dates and regulatory submission dates, as well as the possibility of unfavorable clinical trial results, including unfavorable new clinical data and additional analyses of existing clinical data; the risk that clinical trial data are subject to differing interpretations, and, even when we view data as sufficient to support the safety and/or effectiveness of a product candidate, regulatory authorities may not share our views and may require additional data or may deny approval altogether; whether regulatory authorities will be satisfied with the design of and results from our clinical studies; whether and when drug applications may be filed in any jurisdictions for any potential indication for Pfizer's oncology products and product candidates; whether and when applications that are pending or any such other applications that may be filed for any of Pfizer's oncology products and product candidates may be approved by regulatory authorities, which will depend on the assessment by such regulatory authorities of the benefit-risk profile suggested by the totality of the efficacy and safety information submitted, and, if approved, whether any such oncology products will be commercially successful; decisions by regulatory authorities regarding labeling and other matters that could affect the availability or commercial potential of Pfizer's oncology products and product candidates; and competitive developments. A further description of risks and uncertainties can be found in Pfizer's Annual Report on Form 10-K for the fiscal year

ended December 31, 2018 and in its subsequent reports on Form 10-Q, including in the sections thereof captioned “Risk Factors” and “Forward-Looking Information and Factors That May Affect Future Results”, as well as in its subsequent reports on Form 8-K, all of which are filed with the U.S. Securities and Exchange Commission and available at www.sec.gov and www.pfizer.com.
