Chairman and CEO Albert Bourla Calls on Biopharma Industry to Collaborate on Combatting the Global Pandemic

NEW YORK--(BUSINESS WIRE)-- Pfizer today issued a five-point plan calling on the biopharmaceutical industry to join the company in committing to unprecedented collaboration to combat COVID-19.

Dr. Albert Bourla, Chairman and CEO, made the following statement:

"In this troubling time, Pfizer is committed to doing all we can to respond to the COVID-19 pandemic. Many companies, including Pfizer, are working to develop antiviral therapies to help infected patients fight this emerging virus as well as new vaccines to prevent infection and halt the further spread of this disease. Pfizer is working to advance our own potential antiviral therapies and is engaged with BioNTech on a potential mRNA coronavirus vaccine. We are committed to work as one team across the industry to harness our scientific expertise, technical skills and manufacturing capabilities to combat this evolving crisis."

Pfizer is making five promises that will help scientists more rapidly bring forward therapies and vaccines to protect humankind from this escalating pandemic and prepare the industry to better respond to future global health crises.

1. Sharing tools and insights: With very little known about this virus, many are working to develop cell-based assays, viral screening, serological assays, and translational models to test potential therapies and vaccines. Pfizer is committed to making the vital tools we

develop available on an open source platform to the broader scientific community and to sharing the data and learnings gained with other companies in real time to rapidly advance therapies and vaccines to patients.

- 2. Marshalling our people: Human capital is our most valuable resource. Pfizer has created a SWAT team of our leading virologists, biologists, chemists, clinicians, epidemiologists, vaccine experts, pharmaceutical scientists and other key experts to focus solely on addressing this pandemic. This team is applying their passion, commitment and expertise to a single focus of accelerating the discovery and development process that will deliver therapies and vaccines to patients as soon as possible.
- 3. Applying our drug development expertise: Many smaller biotech companies are screening compounds or existing therapies for activity against the virus causing COVID-19, but some lack the experience in late stage development and navigating the complex regulatory systems. Pfizer is committed to sharing our clinical development and regulatory expertise to support the most promising candidates these companies bring forward.
- 4. Offering our manufacturing capabilities: Once a therapy or vaccine is approved it will need to be rapidly scaled and deployed around the world to put an end to this pandemic. As one of the largest manufacturers of vaccines and therapeutics, Pfizer is committed to using any excess manufacturing capacity and to potentially shifting production to support others in rapidly getting these life-saving breakthroughs into the hands of patients as quickly as possible.
- 5. Improving future rapid response: Finally, to address future global health threats, Pfizer is reaching out to federal agencies including NIH, NIAID and CDC to build a cross-industry rapid response team of scientists, clinicians and technicians able to move into action immediately when future epidemics surface.

"In recent years, the biopharmaceutical industry has brought forward some of the most impactful medical breakthroughs known to society, from therapies for HIV and cancer that have extended millions of lives to novel gene therapies that are seeing cure-like outcomes for some the most devastating rare diseases," said Albert Bourla. "Pfizer calls on all members of the innovation ecosystem – from large pharmaceutical companies to the smallest of biotech companies, from government agencies to academic institutions – to commit to work together in addressing this dire crisis. With our combined efforts we know that there is no health challenge that we cannot overcome."

Disclosure Notice: The information contained in this release is as of March 13, 2020. Pfizer assumes no obligation to update forward-looking statements contained in this release as the result of new information or future events or developments.

This release contains forward-looking information about Pfizer's efforts to battle COVID-19 that involves substantial risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. Risks and uncertainties include, among other things, the uncertainties inherent in research and development, including uncertainties regarding the results of screening and the ability to meet anticipated clinical endpoints, commencement and/or completion dates for our clinical trials, regulatory submission dates, regulatory approval dates and/or launch dates, as well as the possibility of unfavorable pre-clinical or clinical data; the risk that clinical trial data are subject to differing interpretations and assessments by regulatory authorities; whether regulatory authorities will be satisfied with the design of and results from our clinical studies; whether and when drug applications for any potential antiviral compounds may be filed or approved in any jurisdictions, which will depend on myriad factors, including making a determination as to whether the product's benefits outweigh its known risks and determination of the product's efficacy; decisions by regulatory authorities impacting labeling, manufacturing processes, safety and/or other matters that could affect the availability or commercial potential of any such products; our manufacturing capabilities; and competitive developments. A further description of risks and uncertainties can be found in Pfizer's Annual Report on Form 10- K for the fiscal year ended December 31, 2019 and in its subsequent reports on Form 10-Q, including in the sections thereof captioned "Risk Factors" and "Forward-Looking Information and Factors That May Affect Future Results", as well as in its subsequent reports on Form 8-K, all of which are filed with the U.S. Securities and Exchange Commission and available at www.sec.gov and www.pfizer.com.

About Pfizer: Breakthroughs That Change Patients' Lives

At Pfizer, we apply science and our global resources to bring therapies to people that extend and significantly improve their lives. We strive to set the standard for quality, safety and value in the discovery, development and manufacture of health care products, including innovative medicines and vaccines. Every day, Pfizer colleagues work across developed and emerging markets to advance wellness, prevention, treatments and cures that challenge the most feared diseases of our time. Consistent with our responsibility as one of the world's premier innovative biopharmaceutical companies, we collaborate with health care providers, governments and local communities to support and expand access to reliable, affordable health care around the world. For more than 150 years, we have

worked to make a difference for all who rely on us. We routinely post information that may be important to investors on our website at www.Pfizer.com. In addition, to learn more, please visit us on www.Pfizer.com and follow us on Twitter at @Pfizer and @Pfizer News, LinkedIn, YouTube and like us on Facebook at Facebook.com/Pfizer.
