DO YOU HAVE PARKINSON’S DISEASE?

The Pfizer New Haven Clinical Research Unit is conducting a study of an investigational drug for the relief of symptoms of Parkinson’s disease.

You may be eligible to participate in a Clinical Research Study if:

- You are male or female between the ages of 45-85. Females must not be able to have children.
- You have been diagnosed with Parkinson’s disease and are being treated with at least 300 mg of L-DOPA per day.
- You experience slowness in the morning or your medicine wears off and symptoms return prior to your next scheduled dose.

This study requires overnight stays in our Clinical Research Unit. You will be compensated $2,500 for completion of the entire study. Call today for more information.
